## Tri Auto ZX2 nominated for the German Design Award

Endodontic system proposed for the Excellent Product Design category

**Dietzenbach, Germany, July 2018 - the German Design Council has nominated the Tri Auto ZX2 dental endodontic system for the German Design Award 2019 in the Excellent Product Design category. According to the members of the expert team the design of the cordless endodontic motor with apex locator demonstrates the design skill of the traditional company.**

The innovative and unique product, which was first presented to the public at the IDS 2017, stands apart because of its high-quality manufacturing and reliability. Its sophisticated shape and clearly legible display simplify operation. The engineers in the development center in Kyoto, Japan, combine their many years of expertise with new ideas.

The German Design Council presents the German Design Award. This “recognizes innovative products and projects, their manufacturers and designers, who lead the way in German and international design. This is guaranteed by the top-class international jury. The German Design Award discovers and presents unique design trends: a competition, which promotes design-oriented economy.”<sup>1</sup>

The nomination for the international German Design Award in itself underlines the design skill of our developers. The award not only assesses the design but also user-friendliness and cost-effectiveness.

The winners will be announced in the fall.
