

The Latest Advancements in Endodontics

Hands-on CE Course by Denny Y. Fang, DDS

Overview & Objectives:

This educational event will cover recent advancements for improving efficiency in endodontics. During the hands-on workshop, attendees will receive training on endodontic cordless motors and apex locators to save time and improve technical skills for successful canal treatment.

Attendees will learn:

- About the latest endodontic equipment available on the market today
- How to achieve apical patency & create glide paths significantly faster/safer
- To minimize incidents of file separation, canal zipping, ledging & transportation

Audience:

This course is open to North American dentists performing endodontics.

Instructor:

Denny Y. Fang, DDS

Dr. Fang is a board certified endodontist by the American Board of Endodontics. He received his DDS degrees at UCLA. He pursued specialty training in Endodontics at the University of Pennsylvania School of Dental Medicine where he Instructed participants in the uses of microsurgical techniques at the Microscope Training Center. In 2000, he received residency training in root-end surgeries and dental implants at the University of Graz, School of Medicine, Austria. He currently teaches at Loma Linda University School of Dentistry as an assistant professor. Dr. Fang is a paid speaker for this course.
