# Management Philosophy

We offer the best products and services in order to disseminate high quality medical care and contribute to society.

# Company Profile

## Company Name

**J. MORITA MFG. CORP.**

## Registered Trademark

## Capitalization

JPY 394,944,900

## Activities

Manufacture and Sale of Dental and Medical Equipment and Supplies

## Officers

Chairperson:	Haruo Morita
President:	Hiroshi Tanaka
Senior Managing Director:	Tomio Imayoshi
Managing Director:	Yoshihiko Takashima
Managing Director:	Akio Iida
Director:	Etsuo Sakano
Director:	Tomokazu Nishida
Director:	Yuzo Hirukawa
Director:	Mikinori Nishimura
Director:	Shinichi Nakayama
Audit & Supervisory Board Member:	Kanji Morita
Audit & Supervisory Board Member:	Mitsunori Nakanishi

## Locations

### Main Office

680 Higashihama Minami-cho, Fushimi-ku, Kyoto,  
612-8533, Japan  
Tel: +81-75-611-2141 Fax: +81-75-605-2351

### Kumiyama Factory

190 Ichida Shintamaki, Kumiyama-cho, Kuze-gun, Kyoto,  
613-0022, Japan  
Tel: +81-774-43-7594

### Tottori Factory

608 Tani Kurayoshi, Tottori, 682-0954, Japan  
Tel: +81-858-24-0005 Fax: +81-858-24-0015

### Medical Equipment Dept., Tokyo Office

No.801 9-18 Kobuna-cho, Nihonbashi, chuo-ku, Tokyo,  
103-0024, Japan  
Tel: +81-3-5643-1101 Fax: +81-3-5643-1102

### Medical Equipment Dept., Saitama Branch

2F 1-8-6 Kamiochiai Chuo-ku, Saitama, 338-0001, Japan  
Tel: +81-48-840-1512 Fax: +81-48-840-1513

### Medical Equipment Dept., Nagoya Branch

No. 204 Wistoria Build., 4-13-46, Oosu, Naka-ku,  
Nagoya, Aichi, 460-0011, Japan  
Tel: +81-52-259-1535 Fax: +81-52-259-1536

### Medical Equipment Dept., Hanshin Office

No.801 Wakasugi Nishiumeda Build., 5-1-1 Fukushima  
Fukushima-ku, Osaka, 553-0003  
Tel: +81-6-6454-3520 Fax: +81-6-6454-3540

### Medical Equipment Dept., Kyushu Branch

3-25-23, Morooka, Hakata-ku, Fukuoka, 812-0894, Japan  
Tel: +81-92-593-1160 Fax: +81-92-593-1161

## Employees

Total:	748
Office personnel:	259
Engineers:	163
Skilled Workers:	326

(As of 1, Apr 2023)

## Sales

(1) J. MORITA MFG. CORP. provides its products through J. MORITA CORP. to a wide variety of dental universities, hospitals, and clinics as well as various public institutions.

In addition, there are more than 100 representatives, Spaceline Franchise Dealerships (SFD) and Morita Equipment Dealerships (MED) throughout Japan who provide our products to individual dental clinics.

(2) Overseas, our products are available in about 85 countries through associated companies and dealers who provide sales and technical support.

(3) Medical instruments and equipments are provided to university hospitals, other hospitals, and clinics either through representatives and dealers.

## Affiliated Banks

The Mitsui Sumitomo Trust & Banking Co., Ltd.  
Bank of Kyoto, Ltd.  
The Bank of Mitsubishi UFJ, Ltd.  
Sumitomo Mitsui Banking Corporation  
Mizuho Bank, Ltd.  
The Tottori Bank, Ltd.

# Major Products

## Diagnostic and Imaging Equipment

General Dentistry  
3D Accuitomo Series Cone-beam X-ray CT for Head and Neck  
Veraview X800 CBCT and Panoramic X-ray Device  
Veraviewepocs 3D CBCT and Panoramic X-ray Device  
Veraviewepocs 2D Panoramic X-ray Device  
Veraview IC5 HD Panoramic X-ray Device  
Veraview iX Dental X-ray Device  
megadixel Dental CCD Digital X-ray Imaging System  
Penviewer Intra-oral Camera  
i-Dixel Image Processing Software  
Otolaryngology | ENT  
SAI-60 Audiometer  
Nistamo 21 Oculomotor Testing Equipment

## Treatment Units

General Dentistry  
Spaceline Series Comprehensive Treatment Unit  
Soaric Comprehensive Treatment Unit  
Soaric S Comprehensive Treatment Unit  
Portacube+ Portable Dental Treatment Unit  
Handicapped Patient Dental Treatment Set  
Operating Stool  
Operating Light  
Otolaryngology | ENT  
Aurist 21T Series ENT Treatment Unit  
Aurist Chair NDT Series Electrically Operated Patient Chair  
RU-21 Series Nebulizer Unit

## Handpieces and Instruments

General Dentistry  
TwinPower Turbine High Speed Ball Bearing Handpiece  
TORX Medium and Low Speed Micromotor Handpiece  
Air Torx Air motor  
TorqTech Micromotor, Air motor Attachment  
Solfy F Ultra Sonic Scaler  
Pencure 2000 Cordless LED Curing Light  
Lubrina 2 Handpiece Maintenance Equipment

## Endodontic Systems

Root ZX mini Apex Locator Device  
DentaPort ZX OTR Root Canal Preparation  
Tri Auto ZX2 Cordless Root Canal Treatment System  
Tri Auto mini Cordless Motor Root Canal Treatment

## Laser Equipment

General Dentistry  
Erwin AdvErL EVO Er:YAG Laser  
Otolaryngology | ENT  
Lezawin II CO2 Laser

## Auxiliaries

General Dentistry  
Digora Optime II Dental IP Digital X-ray Imaging Systems  
Digora Optime e Dental IP Digital X-ray Imaging Systems  
brumba CL GENIUS Surgical Table  
Otolaryngology | ENT  
Otocross Operating Microscope  
Veterinary  
Oral-vet II Veterinary Dental Unit

## Educational and Training Systems

Practice Bench for Dental Training Simulation  
Phantom DR-11, DR-H Ni:Mo for Basic Clinical Training  
CLINSIM Comprehensive Dental Training Simulation System  
SIMROID Dental Training Robot Simulation System

# History

- 1916 Junichi Morita established Morita Dental Company in Kyoto, Japan.
- 1927 Morita Dental Company established Ishibashi Factory for the manufacture of dental equipment and began manufacture of the "Unit A" the first dental treatment unit made in Japan.
- 1933 New factory, Morita Ishibashi Factory was completed in Kyoto.
- 1936 Dental treatment the "Unit B" was exhibited at "The Shining Japan Exposition".
- 1939 Merger with Morita Ishibashi Factory to form J. MORITA MFG. CORP.
- 1943 J. MORITA MFG. CORP. built a factory in Fushimi of Kyoto, at the site where it is still located.
- 1945 End of war permitted the commencement of the manufacture of chairs and treatment units at the new factory in Fushimi, Kyoto.
- 1950 Merger of MORITA MEDICAL DEVICE MANUFACTURING in Saiin, Kyoto and J. MORITA MFG. CORP. in Fushimi, Kyoto.
- 1959 Development and manufacture of the "Air Jet" a ball bearing, high speed dental handpiece. Technical cooperation agreed with Ritter Corporation of the USA, the world's leading dental equipment manufacturer at that time.
- 1964 Introduction of the epoch-making the "Spaceline" a comprehensive dental treatment unit designed for the latest treatment concept where the patient is supine and the dentist is seated.
- 1967 Development of the "Astron" dental handpiece, an air bearing instrument with a top speed of 500,000 rpm. Also introduction of the "Panex" our first dental panorama X-ray device.
- 1969 Morita Sanshoku Company established in Saitama.
- 1972 Kumiyama factory established in Kuze-gun, Kyoto. Awarded the first in the nation for the Medium and Small Business Research Institute Prize. Awarded as a model for self-auditing companies by the Osaka Regional Taxation Bureau.
- 1976 President Toshio Hasegawa was awarded a Medal with Blue Ribbon.
- 1978 Released the "Aurist" our first ENT treatment unit.
- 1979 Introduction of "Veraview" a direct current dental panorama X-ray device developed in collaboration with Soredex Company of Finland.
- 1982 Toshio Hasegawa, Chairman of the Board, was awarded the Order of the Rising Sun, Gold and Silver Rays.
- 1984 Released the "SpaceMere" delivery chair, the epoch-making chair for giving birth in the sitting position allowing both the mother and midwife to maintain natural postures.
- 1985 R&D Center was built to improve developing technologies.
- 1988 Released the autoclavable alpha series handpiece. Established Tokyo branch of medical equipment department.
- 1989 Established Kyushu branch of medical equipment department.
- 1991 Released the "Root ZX" a new generation of electrical root canal measurement instruments. This instrument simultaneously measures the impedance for two electrical currents at different frequencies, calculates the length of the canal, and then locates the position of the file tip inside the canal.
- 1994 Released the "Solfy ZX" an ultra sonic scaler that can measure, clean and prepare root canals. Introduction of the "Veraview Scope" a multi-functional dental X-ray device for panoramic, tomographic and other types of imaging. Established MORITA MEDICAL ENGINEERING (SHANGHAI) CO., LTD. in China.
- 1995 ISO 9001 certification of our quality management system, being compatible with the British (BS EN ISO 9001:1994), European Union (EN 29001:1994), and Japanese (JIS Z9901:1994) standards. Released the "Spaceline EMCIA" a high quality, European style chair unit.

- 1996 Released the "Erwin" an Er:YAG laser unit developed in collaboration with HOYA Corp.  
Released the "Tri Auto ZX" a root canal treatment handpiece with the capability to electrically measure the length of the canal.  
Celebrated the company's 80th anniversary.  
President Ryuichiro Morita received both the Kyoto Governor's Meritorious Service in Health Care Award and the Ministry of Health and Welfare's Meritorious Service in Health Care Award.
- 1997 Released the "Digora" a digital X-ray imaging system that greatly reduces the X-ray dosage.  
Released the "Veraviewepocs" a direct current panorama X-ray device with a wide variety of additional imaging functions.
- 1998 Released the "Digora LAN" system a digital dental X-ray imaging system using Imaging Plates, and the "Dixel LAN" system for digital dental X-ray images.  
Established J. M. ENGINEERING CORP. for repair and maintenance in Fushimi, Kyoto.  
New R&D Center was built to improve R&D.
- 1999 Released the "Spaceline EMCIA New Tray System".  
ISO 14001 Certification for our environmental management system in recognition of our environmental policy ideal: Morita, as a manufacturer of medical devices to promote health, is committed to creating esthetically pleasing and environmentally safe and healthy manufacturing facilities.
- 2000 ISO 13485 certification for quality management system in the manufacture of medical equipment.  
Released the "TwinPower Turbine" Air Turbine handpiece a masterpiece of fluid dynamics and precision machining.  
Released the "Torx-91" an ultra-low to high speed micromotor handpiece with stable rotation and high torque.  
Received the Inoue Prize from the Japan Science and Technology Agency for the technological excellence of the "Tri Auto ZX" a handpiece for root canal preparation.  
President Ryuichiro Morita was awarded a Medal with Blue Ribbon.
- 2001 Development of a cone-beam X-ray CT for dentomaxillofacial, head and neck regions in collaboration with Nihon University School of Dentistry, the first medical device of its kind certified by the Ministry of Health, Welfare and Labour. Released the "3D Accuitomo" into the Japanese market, for the three-dimensional examination and diagnosis of the dentomaxillofacial regions.  
Released a new, exclusively digital, the "Veraviewepocs" model with high speed, cephalometric capability.  
Released the "Lezawin CH" CO<sub>2</sub> laser which utilizes the world's first flexible, hollow-fiber cable for coaxial delivery of laser beam, guide light and tip air.
- 2002 Released the "Digora PCT" a digital X-ray imaging system utilizing imaging plates.  
Released the "DentaPort ZX" a root canal treatment instrument consisting of two modules.  
Released the "TwinPower Turbine 4H" with light. A low pressure model that can be used with the 4-hole connectors made by other companies.
- 2003 Released the "Dento Hygeia" a specialized dental hygiene unit.  
J. MORITA MFG. CORP. was awarded a technology prize for its the "3D Accuitomo" at the 2nd Conference for Joint Technology Development Programs among Industry, Government and Academy.  
Released the "Spaceline Septus" the latest in our Spaceline series.  
Released the "Scan X" an Imaging Plate (IP) X-ray system.  
Released the "i-VIEW" software, a comprehensive software application for processing digital X-ray images.  
Began overseas sales of the "3D Accuitomo," a cone-beam X-ray CT for the head and neck.
- 2004 Released the "Veraview IC5" a digital panoramic unit with an exposure time of only 5.5 seconds and an X-ray dosage of less than one-sixth of conventional panorama units.  
Established MORITA MEDICAL ENGINEERING SINGAPORE PTE. LTD. in Singapore for the purpose of mainly procurement .

# History

- 2005 Released the "3D Accuitomo FPD" with a new generation of digital X-ray sensors, Flat Panel Detector (FPD) equipped.  
Released the "Erwin AdvErL 25"; a more enhanced Er.YAG laser equipment by the additional specification of high pulse rate irradiation with a wide application to not only hard tissue lesions but also periodontal disease and soft tissue lesions.  
Released the "Digora Optime" in Japan, a digital X-ray imaging plate system which achieves high quality images only after the short readout time as quick as 4.5 seconds.
- 2006 Held a special lecture meeting "3DX Global Clinical Forum" to celebrate our 90th anniversary.  
Released our latest the "Patient Oriented System PdW" with a PdW tray adapting advanced technology for optimum usability and effective treatment.  
Released the "Spaceline Spirit type IV" with either the FMT tray system or the PdW tray system: more versatile and easier to use than ever.
- 2007 Released the "Veraviewepocs 3D"; a single X-ray device for panoramic, cephalometric and 3D imaging, for an even wider and more functional range of diagnostic examinations.  
Released the "Twinpower Turbine X Series" equipped with "Zero Draw-back" that prevents the intake of aerosol and other particles in the handpiece. Released the "Twinpower Turbine 4H X Series" which connects directly to most commonly used coupling types.  
Released the "3D Accuitomo 80"; a cone-beam X-ray CT for dentomaxillofacial region, which provides super high resolution 3D-CT images with 80 µm voxel and its maximum image size is ø80 x H80 mm.  
Released the "3D Accuitomo 170"; a cone-beam X-ray CT for the head and neck, whose maximum image size is ø170 x H120 mm.  
J. MORITA MFG. CORP. was awarded an invention prize from Japan Institute of Invention and Innovation for its invention of both the "3D Accuitomo" and "Veraviewepocs 3D".
- 2008 Established Nagoya branch of medical equipment department.  
Released the "Spaceline feel 21 type N" equipped with high-level infection control.
- 2009 Released the "Spaceline Spirit V" equipped with the water supply conduit cleaning system.  
Released the "Air Torx" an air motor handpiece which generates efficient, powerful, and constant torque even at a low speed.  
Released the "Root ZX mini" a compact and lightweight root canal measurement device.  
Released the "Veraview IC5 HD" with high resolution imaging.
- 2010 Completed realization of conversion to all LED lights for operating lights, handpieces and motors. Began marketing of the "TR-SS"; which is 30% lighter and more compact than our previous models.  
Released the "TorqTech" attachments for air motor, micromotor handpieces. These are quieter, more durable, and have less burr wobble due to advanced precision machining. Began sales of the "TwinPower Ultra E" and "TwinPower Ultra M" handpiece series. These have smaller heads that are easier to use inside the confined space inside the oral cavity.  
Construction of the "Techno Lab" for further technological advances.
- 2011 Exhibited for the IDS 2011 (Köln International Dental Show), the largest dental show in the world and released the "Soaric"; our latest dental treatment unit which features a stylish design and the most advanced technology.  
The available air turbine handpieces include the "Twin Power Turbine 4H Ultra" series.  
Released the "Veraviewepocs 3Df" which features a unique FOV for the dental arch.  
Introduced our latest surgical laser unit, the "Erwin AdvErL EVO"; featuring a wide variety of tips that open up new areas of treatment.

- 2012 The "Soaric" was awarded the Gold Award at the prestigious iF Design Contest held in Munich, Germany and Good Design Gold Prize.
- 2013 Opened Tokyo Office with showroom for Medical Device Division.  
Released the "Portacube" homecare unit.  
Released the "Solfy F" ultra sonic care with water bottle.
- 2014 Opened office in Jakarta, Indonesia.  
Redecoration of east wing Technical Center and History Museum in February. The "DentaPort ZX" with new "OTR (Optimum Torque Reverse)" function. Phantom "DR-H Ni:Mo" for dental hygienist training became available.  
The "Spaceline EMCIA III Parfum Premium" model marked 50th anniversary of Spaceline series.
- 2015 Released the nation's first mobile cone-beam X-ray CT the "3D Accuitomo M".  
The "3D Accuitomo F17D" highly praised in both the dental and medical market, became available.  
Released a new dental treatment unit the "Soaric S", which exhibits the same excellent design as the Soaric, along with simplified operation.  
Upgraded the "Veraviewepocs 3D R100", with improved panoramic image quality due to a new model of flat panel detector with higher sensitivity. Together with the improvements to the imaging software the "i-Dixel", diagnosing 3D images is smoother than ever.  
Released the "Spaceline HPO-0", equipped with the latest features while still adhering to the very best of the Spaceline concept.  
Released a new intraoral camera, the "Penviewer", based on coaxial illumination technology, which is also used in microscopes.  
Released a new intraoral X-ray diagnosis system, the "Digora Optime e", in Japan which adds new functionalities and is the latest model of the long-standing Digora Optime series.
- 2016 Opened our Tottori Factory in Kurayoshi city, Tottori Pref. on the 1st of April.  
The new "TorqTech" speed reduction series is introduced. Began sales of the "Veraview X800" which makes both panoramic and CT exposures. Released the "Veraview iX (RAL model)" dental X-ray device, which harmonizes with the fine design style of the "Veraview X800". Celebration of the 100th anniversary of the founding of the company at the Kyoto International Conference Hall.
- 2017 The "Veraview X800" awarded the Gold, the highest level, at the iF Design Awards ceremony in Munich, Germany. The "Veraview X800" awarded the Good Design Best 100 of the Good Design Award. Introduce and began sales of the "Veraview X800 F150" and the "Tri Auto ZX2" at the IDS 2017.  
Released a new dental treatment unit Pref on the "Spaceline EX".
- 2018 The "Spaceline EX" awarded the Gold, the highest level, at the iF Design Awards 2018 ceremony in Munich, Germany. Released a new dental handpiece maintenance device the "Lubrina 2", which efficiently maintains the best condition of the handpieces.
- 2019 Released new X-ray devices the "Veraviewepocs X700+ 2D" and the "Veraview IC5 HD+", which were both equipped with the AFP (Adaptive Focal Point) function that has been highly praised on the "Veraview X800" and the "Veraviewepocs X700+ 3D". Released a new veterinary X-ray device the "OVX-iX".  
Released a new comprehensive portable treatment unit, the "Portacube+", which allows common treatments outside the clinic.
- 2020 Released a new CT specialized X-ray device, the "3D Accuitomo F17D+", which has a wide variety of FOVs and superior image quality with excellent product design.  
Released a new dental treatment unit the "Spaceline ST", which inherits our "human-centered" design concept with new capabilities for greater efficiency in professional practices.

# History

- 2021 Released a new Apex Locator with the additional Module for a new feature of the HFC (High Frequency Current) treatment to the existing high precision root canal measurement device as the new brand name of the "Root ZX3".
- Released the "Veraview X800 One Shot Cephalometric" to cover almost entire cranial region with 0.5 second of exposure time.
- A new image filter function the "AGS2 (Adaptive Gray Scale2)" dedicated for a Panoramic Radiograph is added to the "i-Dixel" digital imaging software to automatically adjust the optimum contrast for the each region of Panoramic image to provide the best diagnostic observation.
- An optional function the "Airway Drawing" is released for generating 3 dimensional image of airway from the acquired 3D CBCT data.
- 2022 Released the "Spaceline ST BM," a new compact dental treatment unit with a variety of functions to support efficient treatment.
- Released a 1:5 speed-increasing, ultra-mini model of the "TorqTech" series. Its miniature head makes it easier to use in the molar region and improved visibility of the treatment area.
- In Japan, the "Partial Panoramic Tomography" is now covered by health insurance so the feature was released into the Japanese market for both the "Veraviewepocs X700+ 3D" and "Veraview X800" X-ray devices.
